ASSISTED EMPLOYMENT IN OPEN MARKET

Since year 2002, working together with Dutch experts, we started with the „Assisted employment“ project, whose creator was Alma Bajraktarević, BA.

Through occupational and working activities the client practices skills important for the working process, as well as communication skills needed for better adjustment to new work environment.

Working assistant gives support to the client, but in this proces they work as partners.

The model of rehabilitation in the open market employs 27 clients.

The client has a contract and is fairly compensated for his/her work.

The Center and the company make a collaboration contract.

So far three clients have been fully employed. Three companies are employing our clients on positions for packing, labeling and sorting various merchandise, as well as in maintenance department. Those are Kühne & Nagel, dm and Atlantic grupa.

After nine years of succesful program implementation today we have both a satisfied client and a satisfied employer.

A large number of clients are ready and motivated for the open working market.
